12 Lead Electrocardiography For Emergency Care Providers

December 7 & 8, 2009

and

December 9 & 10, 2009

10:00AM-5:30PM

*Course fee \$295
All materials included*

This program will give the prehospital care or remote provider the skills necessary to recognize and initiate treatment for ST segment elevation myocardial infarction (STEMI).

At the end of this two day program*, the student will be able to:

- Explain the importance of early recognition of STEMI and the role of 12 lead electrocardiography in early diagnosis and treatment
- Demonstrate the ability to proficiently acquire a diagnostic quality 12 lead electrocardiogram
- Demonstrate the ability to recognize and localize STEMI, ischemia, and age indeterminate MI
- Demonstrate the ability to recognize and differentiate Left and Right Bundle Branch Block
- Demonstrate the ability to identify six STEMI “imposters”, and, as a bonus
- Demonstrate the ability to apply current criteria in the differential diagnosis of Wide Complex Tachycardia
